

Research workshop

"Resilient Horizons: Place, Governance, and Organizational Adaptation in the Age of Climate Disruption"

Florence (Italy), 4-5 December 2025

Aim and scope

This international research workshop aims to explore innovative, mixed-method approaches to climate impact assessment, with a focus on how environmental disruptions affect socio-ecological systems and challenge organizational sustainability. Bringing together scholars, practitioners, and policymakers from a variety of disciplines, the workshop will shed light on how businesses, communities, and institutions respond to climate-related crises, examining frameworks for adaptive strategies, assess best practices, and explore the role of managerial decision-making in building long-term resilience. Its ultimate goal is to provide an opportunity to spread and disseminate the most recent research on these issues.
